ABSTRACT

In addition to regular degree programs, the Netherlands has been offering another form of higher education for almost 45 years. Advanced courses are conducted in English in what is known as International Education (IE). These advanced courses have traditionally been offered at special IE institutes, but now traditional universities and universities of professional education, called "hogenscholen" in Dutch, are also offering a large number of English courses at various levels. This document describes the Dutch higher education system and its traditional degree programs and IE programs throughout the Netherlands. Both types of universities are increasingly offering courses under an alternative structure that allows students to pursue a traditional Dutch degree or opt for an Anglo-Saxon style bachelor's or master's degree. This booklet lists more than 500 higher education courses offered in English in the Netherlands, grouped by the main focus of the course. The booklet also contains general information about traditional and English-language higher education in the Netherlands, including details about costs and financial aid, housing, visa requirements, and life in the Netherlands. Looking for a world study?

Towiserkan

ITC offers Master of Science courses (18 months) and Professional Master Courses (12 months) in the following six educational programmes (each with specialisations).

Focus is on geoinformation management for sustainable development.

Geoinformatics
Photogrammetry and Remote sensing - Geographic Information Systems - Cartography and geoinformation visualisation - Optimisation of Geoinformatics Processes

Geoinformation Management
Urban Information Systems - Rural Information Systems - Cadaster and Land Registration

Urban Planning and Land Administration
Urban Planning and Management - Urban Land Administration - Urban Infrastructure Management

Natural Resources Management
Planning and Coordination in Natural Resource Management - Sustainable Agriculture - Rural Land Ecology - Forestry for Sustainable Development - Soil Information for Sustainable Land Management - Environmental Systems analysis and management

Earth Resources and Environmental Geosciences
Applied Geophysics - Coastal Zone Studies - Environmental System Analysis and Management - Geological Engineering - Geological Resource Management and Environmental Geology - Land Degradation, Conservation and Rehabilitation - Mineral Resource Exploration and Evaluation - Natural Hazard Studies

Water Resources and Environmental Management
Watershed Management, Conservation and River Basin Planning - Groundwater Resources Evaluation and Management - Environmental System Analysis and Management

ITC also offers special courses and a PhD programme.

Information on ITC's educational programmes and application procedures can be obtained from:

Just tulips, windmills and wooden shoes?

nic, *knowledge-based* society

Ask anyone what the name Holland or the Netherlands brings to mind, and they will probably say tulips, windmills and wooden shoes. This was the image that once drew tourists from all over the world. But there is more to see and do in the Netherlands. Behind those dykes is a dynamic, modern society. One based on knowledge, and ready to be discovered....

Anyone who travels over the Netherlands' flat, green surface soon sees signs of the country's rich past. The windmills that dot the landscape include traditional ones that were once used for regulating water levels in the polders, and for grinding grain and making paper. But you also see high-tech wind turbines serving as an alternative source of energy. For although the Netherlands has an old culture, with traditions that go back centuries, it is also an ultra-modern society with a booming post-industrial economy.

ADVANCED SERVICES

The almost 16 million inhabitants of the Netherlands live on a flat delta at the mouth of the mighty Rhine and Meuse rivers. Much of Europe's economic development has taken place, and still does take place, along the banks of these two European arteries. Rotterdam, at the mouth of the rivers, has developed into the world's largest port. Shiploads of goods are unloaded here. Not all of these products stay in the Netherlands; most are eventually distributed elsewhere, often after a process of refinement or fabrication has added value.

The Netherlands is a net exporter of food. Among other things it exports more dairy products than any other country of the world. The

Netherlands is also home to many multinational companies, among them Shell, Philips and Unilever. But as befits a modern economy, the country's prosperity is based primarily on the advanced services it provides on a worldwide basis.

AN OPEN AND SAFE SOCIETY

A country that offers global services has an attitude of openness towards the rest of the world. It is open to do business, but it is also open socially and culturally. This makes the Netherlands ideally suited for receiving people who seek to enrich their knowledge through study abroad. What they find is hospitality in an open, safe society that is accustomed to dealing with people from around the world, and above all, to working with them.

The Dutch population itself has always represented a variety of religious and political viewpoints. Respect for the other person's opinions and convictions is the national virtue that gives strength to the fabric of society, with its many strands. In one sense or another, everyone is a

Interview

"An exciting place to study the economics of Europe." Charles Reed Anderson, United States of America

Charles Reed Anderson (28, USA) wanted to spend some time studying and living in Europe so that he could get a feeling for its different economic systems and its variety of peoples and cultures. With his degree in business he had worked for several years in big American companies, but now he wanted to take time off to earn an MBA in an international programme. Charles was accepted at both the London Business School and the Rotterdam School of Management. He chose Rotterdam. Why? **"The Dutch style of education is more practical and hands-on, more based on actual business cases,"** Charles explains. "The teaching staff has all had experience working in large companies or running their own consultancy bureaus. So you can learn not just theory from them, but also how they applied that theory in real life situations."

Charles has not regretted his decision for one minute, he thinks the Netherlands is a wonderful country. He especially enjoys the congenial, lively atmosphere of cities like Amsterdam and Utrecht. These cities are famous for their old city centres, complete with canals, friendly pubs, and sidewalk cafes, where people are visibly enjoying life. **"It's a very social environment,"** says Charles. The fact that nearly everyone in the Netherlands speaks at least some English also makes life easier for foreign students, who do not have to invest time and energy in learning a foreign language unless they want to. Charles has learned a bit of Dutch, however, which he reports is "an interesting language with some very odd sounds." He is enthusiastic also about the safety of the Netherlands. "I walk across the entire town late at night, and have never had a problem. It's great to be able to move around like that and feel safe and relaxed."

Already Charles is reaping the benefits of his time in Rotterdam, thanks to the many international contacts he is making. This makes him optimistic about his future. **"In my programme there are 120 students from 40 countries, which means that we already have an incredible global network, and we'll all continue to add friends and business contacts to it after we go back home.** So for networking, Rotterdam has been a great place to start. Also, I figure I'll be more marketable in the States because I understand how the economies of Europe work."

member of some minority, and understands that to be treated with respect requires treating others the same way.

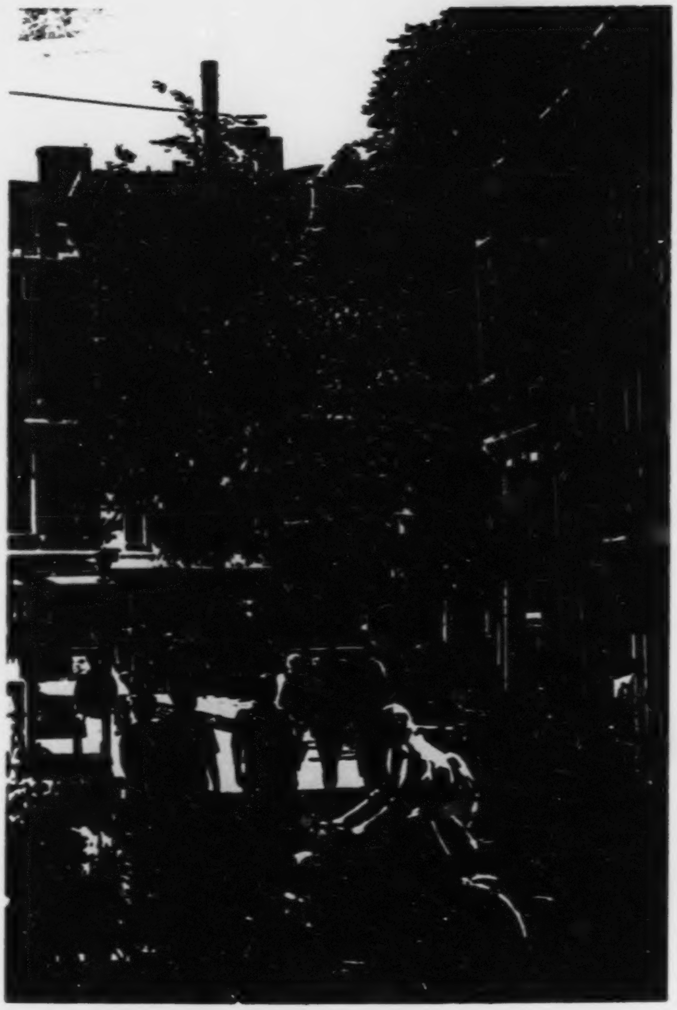
POLDER MODEL

The Dutch *poldermodel* has become famous in the world. Consensus lies at the heart of the Netherlands' success where unemployment has been reduced to half (3% in 1999) of what is was in 1983. The government, with support of employers and unions, has cut public spending as a share of GDP from 60 to 50%. It is the combination of a quiet and flexible labour market with solid monetary and fiscal policies and the introduction of more dynamic markets which is the core of the polder model.

The national income in 1999 was approximately 25,000 US dollars per capita. This wealth is distributed fairly evenly over the population as a result of a graduated system of taxation (the more you earn the higher percentage you pay in tax) and an elaborate system of subsidies and social benefits. All this has three consequences. First, if the Netherlands wants to maintain this level of prosperity it must earn its living with advanced products and services. This means that continuous innovation on all fronts is absolutely vital. Secondly, the country needs a highly educated population. And thirdly, it must be cosmopolitan-oriented to the world, and without provincialism.

COSMOPOLITAN OUTLOOK

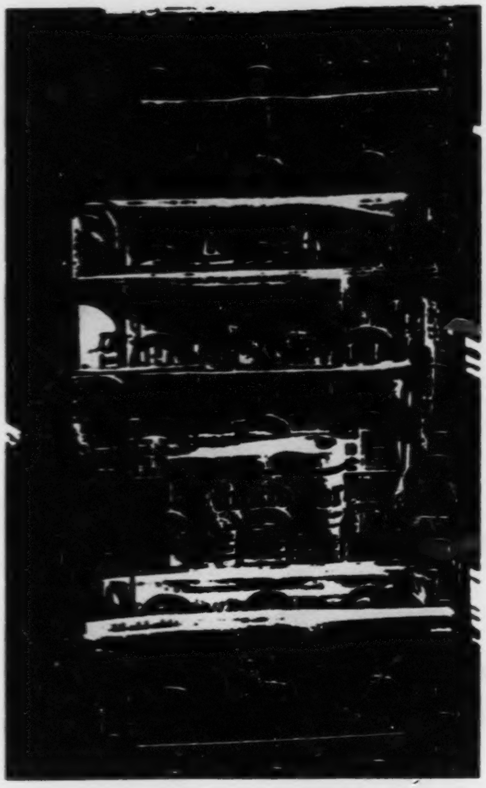
'The rest of the world is a big place', say the Dutch, well aware of how small their country is with its 41,000 square kilometres. The Netherlands lies at the point where the German, British and French cultures meet. This is evident as soon as you turn on the television. In this well-cabled country, programming from the neighbouring countries and beyond can be received in nearly every household. It is also evident in the average Dutch bookstore. The Netherlands imports more books in English than any other non-English-speaking country. And the world's largest scientific publisher is located in the Netherlands: Elseviers Science Publishing. Cinemas show films from around the world in their original languages. Alongside the usual church towers and synagogues, the minarets of mosques are now appearing in the large cities. You can dance the salsa every bit as easily as in Latin America. And Asian, Mediterranean and fast foods are becoming as familiar as standard Dutch fare.



Against this background, it is not surprising that the Netherlands is an advocate of international cooperation on many fronts. It is a founding member of the United Nations, for example. In several UN organizations, including the Food and Agriculture Organization (FAO), the Netherlands plays a much larger role than one might expect from the country's modest size. It also does more than its share to help fund the UN.

GATEWAY TO THE EUROPEAN UNION

Although Dutch people are urbanites who can easily imagine themselves living in London, New York or Paris, there are no really large cities in the Netherlands. The largest city is Amsterdam, but even this city has a population of only 727,000. The Dutch have an urbane, cosmopolitan lifestyle, but in cities built on a human scale. Closer inspection reveals that the cities in the western part of the country in fact form a continuous ring, 60 kilometres in diameter. It's called the *Randstad* and includes Amsterdam, Rotterdam, The Hague, Utrecht, Leiden and Delft. But each city has its own character, specialities, history and city centre, and even its own accent in the Dutch language.



The atmosphere in the rest of the country is urban as well, despite the small scale of communities. In this small country with an ultra-modern telecommunications network and an extensive system of public transportation, nothing is far away. You can traverse the Netherlands by train in less than five hours. Other European capitals are also within easy reach. Brussels is two hours by train, and a one-hour flight from Schiphol Airport will take you to Paris, London or Berlin. The Netherlands is thus quite literally a gateway to the European Union, of which it is also a founding member.

EDUCATION: CONTINUOUS QUALITY CONTROL

Dutch people live in this cosmopolitan atmosphere without losing their own identity, however. This is largely due to their education. A well educated populace is the first requirement for maintaining a high level of prosperity. Schooling is compulsory up to the age of 16. All education, from primary school all the way to the postgraduate-level research schools, is financed by the government, which also keeps an eye on standards through the education ministry's inspectorates. It is not a state system, however. In no way does the government dictate which curricula or textbooks should be used, nor does it advocate any particular educational philosophy. It merely sets rules regarding the duration of studies, and the achievement levels that must be reached. The result is that the Netherlands has a broad spectrum of educational institutions, each with its own character and in some cases its own philosophical background.

Teachers are not there merely to pass on knowledge. Their aim instead is to help young people to discover knowledge themselves, and to form their own well-founded judgements regarding that knowledge. To do this a person must be able to communicate with other peoples and cultures, which is why learning foreign languages is so important not only in secondary schools but also in the final years of primary school. Every person in the Netherlands who has gone beyond primary school–and that is nearly everyone–has passed state exams in English and probably another foreign language as well. Many Dutch people enroll in the growing number of courses and study programmes that are taught in English alongside the regular higher education conducted in Dutch.

HIGHER EDUCATION AND SOCIETY

Internationally speaking, Dutch higher education has a very good reputation. This is based not only on such Nobel-prize winners as the Tinbergen brothers (Jan in economics, and Nico in ethology), but more importantly on the standard of the average graduate. In general, it is fair to say that a person who has completed a programme of Dutch higher education has mastered the breadth and depth of theory they need to work creatively within their discipline. A large share of all study programmes is occupied with writing papers, working in groups to analyze and solve specific problems, acquiring practical work experience in internships, and conducting experiments in laboratories. There are close links between the world of work and the needs of society on the one hand, and higher education and research on the other. The government spends NLG nearly 5.5 billion (USD 2.7 billion) a year supporting fundamental research, which is conducted by universities, research institutes and private enterprises. This is NLG 350 (USD 175) per head of population.

INNOVATIVE MENTALITY

Dutch employers expect to be able to put young applicants directly to work, even in positions of responsibility, without first giving them extra training. Because of their broad educational backgrounds, young graduates are thought capable of dealing with new developments and novel problems. Experience shows that people with Dutch higher education function very well in other parts of the world as well. The cosmopolitan outlook of Dutch institutions, and the familiarity students gain with scientific literature from other countries, ensure that they quickly feel at home in a foreign professional situation. They move easily into excellent positions. They have adopted the innovative mentality that is such an essential part of Dutch education. But at the same time they have learned the value of tradition and continuity, for these too are part of Dutch higher education, which traces its roots back to the 16th century.

international education in English

Advanced training for students and professionals

Besides regular degree programmes, the Netherlands has been offering another form of higher education for almost 45 years. Advanced courses are conducted in English in what is known as International Education, or IE. These advanced courses have traditionally been offered at special IE institutes, but nowadays the universities and the universities of professional education, called *hogescholen* in Dutch, are also offering a large number of English courses at various levels.

International Education was meant originally for people at postgraduate level who already have some professional experience. Most of the international courses are in disciplines in which the Netherlands has long played a leading role. These courses are becoming more numerous and cover an ever broader range of fields. The ones that are particularly well known around the world are in management studies, the agricultural sciences, medicine, civil engineering, remote sensing, and the arts. Curricula are intensive, at an advanced level, practically oriented, and designed to meet the expectations of students seeking specialized knowledge. The courses alternate theory with practice in real or simulated work situations. These are in fact the main characteristics of the more than 500 international courses offered nowadays at various levels in the Netherlands. Each year just over 5000 students enroll in these courses, which last anywhere from a few weeks to four years. Most courses lead to a diploma; a number of the longer courses lead to a master's degree. All of the universities award doctorates, and at some of the IE institutes, in cooperation with the universities, one can earn a PhD.

TEACHING AND LEARNING

All courses are designed for students and professionals who wish to add depth to their existing knowledge. Students of International Education have access to the Netherlands' entire academic infrastructure, including the universities' libraries. Many international courses include fieldtrips to relevant companies and organizations in the Netherlands and sometimes even elsewhere in Europe.

All IE courses revolve around how to apply specialized scientific knowledge to solving problems. This concern for practical application requires curricula that are flexible. Teaching staff must be capable of adapting to the varying demands of students who face similar problems

"The professors will spend a lot of time on you, whenever you need it."
Jayati Samanti, India

Interview

After Jayati Samanti (27, India) earned her degree in Environmental Studies in her own country, she first went to work for the government and then spent a year as a consultant for a bureau. To enhance her career prospects, she enrolled in the 18-month master's programme in Environmental Science and Technology at the Institute for Hydraulic and Environmental Engineering (IHE) in Delft. The main reason for choosing the Netherlands for postgraduate studies was because it offered international experience in an international setting.

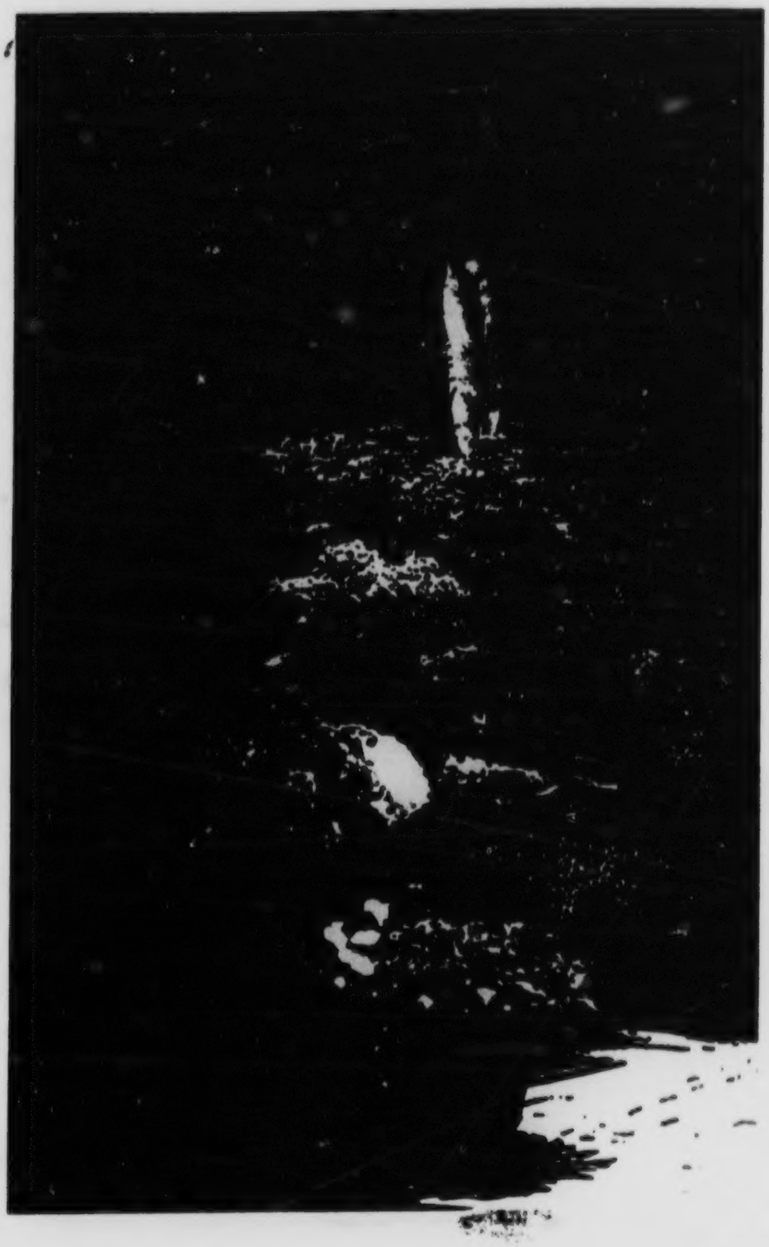
she explains. "And the institute often invites guest lecturers from other countries so we can learn what is going on there as well. By exchanging knowledge and sharing experiences with guest lecturers and the other overseas students, I am acquiring international expertise in my field. I'm also building up a network of contacts that will be invaluable in the future."

Jayati is very pleased with the quality of Dutch education, and especially with the facilities she has at her disposal. "The educational level is high and the pace is fast, but I came prepared to work hard. We're not on holiday here. And the computers and other facilities are very modern.

She receives a lot of help from the teaching staff, both academically and socially. "They spend a lot of time on you whenever you need it. They never let you down," she says, with visible relief. Jayati has even got into student politics to become more involved and to make sure her voice is heard on matters related to the course. She also became a member of IHE's student board.

Jayati is also enjoying life in the Netherlands. She finds the Dutch people friendly, and feels safe everywhere - even on the street late at night. Her safety was her parents' biggest concern, but she has assured them that she is in a safe environment and there is nothing to worry about. Jayati's dream is eventually to start up her own consultancy, and to share the international expertise and contacts she acquired in the Netherlands with her own clients.

but in vastly different contexts. This means that International Education places heavy demands on the students themselves. To get the most out of a course they must actively contribute.



ADVANTAGES

For the person who wishes to increase and update his or her expertise, international courses in the Netherlands offer many advantages:

- Courses are at an advanced level.
- They are conducted in English.
- They are intensive.
- They are both theoretical and practical.
- They offer an inside view of advanced science and technology as applied in the Netherlands.
- The curricula are flexible and can be adapted to suit a person's own requirements.
- The institutions look after their international students (offering help with housing, an introductory programme, etc.).
- The courses are high quality and low cost.

ADMISSION AND REGISTRATION

Admission requirements for the courses vary, but for most courses, successful applicants have at least a bachelor's degree or its equivalent, plus several years of on-the-job experience. Other courses are at undergraduate level and therefore require only a senior secondary-school certificate. For all courses it is absolutely essential that a person understand, speak, read and write English well.

The lists of courses in this booklet offer a brief overview of the possibilities. More information about the courses, their admission requirements and tuition fees can be found on the Internet (http://www.nuffic.nl/study/) or obtained directly from the institutions. Their addresses are listed in the overview of international courses and programmes, and at the back of this booklet.

Broad range of choices

What can the higher education institutions offer you?

The Netherlands has three main types of higher education institutions. You will find research-oriented education at the universities, and higher professional education at the universities of professional education (known in the Netherlands as *hogescholen)*. There are also institutes of International Education which were set up originally to meet developing countries' needs. International courses conducted in English are now offered at various levels by all three types of institution.

UNIVERSITIES

The Netherlands has universities which train students for the independent practice of science. The oldest is *Leiden University*, which was established in 1575. The universities of Amsterdam and Utrecht are the largest, with about 22,000 students each, approximately 1000 of whom are from other countries. Average enrollment at a university is 12,000. The degree programmes are designed to take four or five years to complete, the final requirement being a thesis based on the student's own research. Dutch university graduates have the right to use the title 'Master'.

The universities do not all have programmes of education and research in the same disciplines. Nine offer education in a broad range of fields: natural sciences, health, economics, law, behaviour and society, and language and culture. These are the universities of Leiden, Amsterdam (two), Groningen, Utrecht, Maastricht, Nijmegen, Tilburg and Rotterdam. Three universities specialize mainly in engineering (Delft, Twente and Eindhoven), and one specializes in agriculture (Wageningen).

Alongside the traditional institutions is the Open University, which offers distance higher education to people who wish to obtain a degree or diploma but are unable or do not want to attend full-time, regular courses. There are no educational prerequisites for the Open University; all applicants over the age of 18 are admitted. The Open University offers some of its study programmes in English.

UNIVERSITIES OF PROFESSIONAL EDUCATION

The universities of professional education, known as *hogescholen* in Dutch, are degree-awarding institutions which concentrate on applied science, arts and technology. Students are prepared for professions that require scientific knowledge as well as skills for applying that knowledge. There are 55 universities of professional education in the Netherlands, susidized by the government, enrolling a total of some 280,000 students. The institutions pride themselves on being flexible and alert. They generally have close ties with the industries and organizations that employ their graduates. This enables them to adapt their programmes quickly to the changing needs of the labour market.

An essential component of all programmes of higher professional education is the internship, or work placement, through which students acquire practical experience in real work situations. The fourth year is taken up mainly by an individual project and thesis; this too usually involves solving a real problem in a professional setting. The graduates may use the title 'Bachelor'.
The universities of professional education offer a variety of full-time and part-time programmes in any of seven sectors: agriculture and the natural environment, behaviour and society, health care, engineering and technology, fine and performing arts, economics and management, and education. Advanced programmes are available in virtually all these sectors. They can last anywhere between two weeks and two years. Some lead to postgraduate diplomas, and some to accredited master's degrees. The latter are often conferred in cooperation with a British university.

INTERNATIONAL EDUCATION INSTITUTES

The Netherlands has 15 higher education institutions devoted specially to International Education, or IE. The IE institutes feature development-oriented education in a wide range of fields and on different levels. The possibilities vary from short courses to PhD degrees. Most courses are for a diploma or master's degree, however. Mid-career professionals from developing countries are the target group of the IE institutes. Both students and teaching staff come from countries all over the world.

Dutch IE institutes have been offering courses taught in English since the early 1950s. At first, the courses lasted between a few months and one year and were concluded with a diploma. But in the 1970s Dutch development policy changed and the IE institutes shifted their focus more towards helping universities overseas to build up their own capacities. They began to cooperate within a worldwide network of institutions and to diversify their own work to include more research and consultancy. At the same time they updated and upgraded the courses offered in the Netherlands. Gradually, short diploma courses were replaced by a growing number of more advanced academic courses. Most last approximately 18 months and end with a master's degree, but some IE institutes even offer PhD possibilities, in partnership with a university.

Traditional Dutch courses

Enrolling in a regular degree programme

Despite the fact that most regular degree programmes are conducted in the Dutch language, more and more international students are enrolling in them. A recent development is that both types of Dutch university are increasingly offering courses under an alternative structure. Students may pursue a traditional Dutch degree or opt instead for an Anglo-Saxon style bachelor's or master's degree.

The starting level of Dutch higher education is high. The academic year is long, starting at the end of August and ending in mid-June. Programmes are designed to require 40 hours a week, including both contact hours and hours of independent work. At both universities and universities of professional education, the formal length of most study programmes is four years, although in some cases students are allowed more time than this. The main exceptions are university research programmes in engineering, technical studies and agriculture which take five years.

The quality of all Dutch universities is thought to be the same so that what matters in the Netherlands is the degree that you earned and not the university where you earned it. The same is true of the universities of professional education. Academic titles are legally protected in the Netherlands, and may be conferred only by recognized institutions that meet certain standards.

ADMISSION TO A REGULAR DEGREE PROGRAMME

If you are considering enrolling in a regular, four- or five-year programme of study at a Dutch institution, there are several things you need to know. To choose the programme and course that meet your needs, you must obtain all the necessary information from the institution in question. The best person to contact first is usually the student dean; this should be done at least a year in advance of the academic year you wish to come to the Netherlands.

Admission to regular higher education is centrally administered, and there are national requirements. Foreign students must have a secondary-school diploma judged to be equivalent to the minimum diploma required of Dutch students. The institutions may set additional requirements, such as knowledge of the Dutch language and secondary-school specialization in specific subjects. Language courses and remedial courses are often available to help students fill gaps and thus meet such admission requirements. In some fields – the arts, for example, and hotel management – the institutions have even more freedom to set requirements and select students. Their international relations offices can provide you with details about all the formal procedures that precede registration.

The fees that foreign students pay for registration and tuition vary from one institution to the next, since the institutions set these fees themselves. Generally, the combined fee is somewhere between NLG 3000 and NLG 5000 a year. The institution of your choice can tell you the exact amount. You will find a complete overview of degree programmes (conducted in Dutch) and the addresses of the institutions in the Nuffic booklet 'Dutch Degree Programmes, 2001-2002'. To order it, see the address at the back. This overview is also available online (http://www.nuffic.nl/study/).

Interview

"The courses in other countries couldn't compete with it."

Dirk Haubrich, Germany

"There are several reasons why I came to study in Holland," says Dirk Haubrich (33, Germany). "I found out that the course in sonology given at the Royal Conservatory in The Hague is probably the best in the world. The way it's taught was also very important to me. Here you learn to really develop yourself and get your own style of performing. You're not trained to imitate the style of the 'master' or the 'founding father', as you see in other countries. Here the teachers help you get the best out of yourself. Also, the facilities are very good; you're using the very latest software. It's what you'd expect, knowing that the centre of all multimedia developments lies in this region. And the final reason for choosing The Hague—but not an unimportant one—was that the tuition fee is low. The courses in other countries couldn't compete with it."

Dirk started in The Hague with the international one-year course. He was so satisfied that he decided to continue in the regular four-year course. "The international environment I find over here is essential to me. Among other things, the staff and students are from all over the world. Especially in the arts, you develop yourself by interacting and exchanging with people who have other backgrounds and influences. For me it wasn't about getting the diploma; I just wanted to develop myself further. But now that I've finished I see that my diploma is very important to the organizations and employers I talk to. Especially because The Hague's conservatory has such a good name, my diploma opens doors."

Dirk learned to speak Dutch quite well. "But I still use English a lot, especially with the international music and dance companies I work with. That's maybe one disadvantage of Holland. People in shops and in the streets are very friendly, but they speak English so easily that they make it hard for you to practise their language." Openness is another feature Dirk sees as typically Dutch. tionship between student and teacher is very informal. Dirk got along well even with his landlady. Because the school and its studios are open until late, Dirk often came home around ten in the evening. He would stop in for a chat with her. "The landlady taught me something very useful: how to fill a *jenever* glass right to the rim and then to empty it without spilling a drop. At first I thought she was trying to trick me into spilling, but now I know that's the way you're supposed to drink Dutch gin."

OBTAINING A DOCTORATE

Most students' academic careers end with the *doctoraal*, which, internationally speaking, can be equated to a master's degree. One type of *post-doctoraal* study leads to the doctorate, the highest academic degree in the Netherlands. Candidates conduct independent research, and report the results in a dissertation, which must be publicly defended. If successful, they may use the title *doctor*, which is abbreviated to *dr*. The Dutch doctorate is comparable to a British PhD. Normally this takes four years and consists of conducting independent research and writing a dissertation. Holders of a bachelor's degree are not automatically eligible to pursue a doctorate in the Netherlands.

A doctoral candidate is not generally considered a student, but in most cases is employed by a university as a research assistant. Most Dutch university departments do accommodate doctoral candidates from other countries. For example, foreign students can earn a doctor's degree using the 'sandwich model'. They prepare their research projects at the Dutch university, conduct fieldwork in their own countries, and then return to the Dutch university to write up and defend their dissertations and receive their degree.

A few of the International Education institutes, which tend to specialize in fields with particular relevance for developing countries, also offer the possibility of earning a doctor's degree or a PhD. Generally the degree is awarded jointly by the institute and a university. For this purpose a small number of scholarships are available. To be eligible, you must be from a developing country and able to guarantee that you will go back to your own country to work when you are finished. PhD candidates at IE institutes generally do fieldwork in their own country or in another developing country; in fact, their research topic must be related to development. The Dutch diplomatic representative in your own country can give you more information about these possibilities.

Education in English or Dutch

15

The more than 500 international courses named in this booklet are conducted entirely in English. Because of the courses' fast pace and advanced level, it is essential that all students understand, speak, read and write English well. Nowadays there are also many foreign students enrolling in regular degree programmes, where it is becoming increasingly possible to receive instruction and do your own work in English. This is only true for the later years, however. The language of instruction in the first year of regular programmes will generally be Dutch. For this reason, it is easier for foreign students to come to the Netherlands at a later stage in their studies or to enroll in one of the international study programmes, where the language of instruction is English from start to finish. Dutch students are becoming also accustomed to speaking English and most will switch to English any time there is a foreign student in their project group, even if that student learned to speak some Dutch before coming to the Netherlands.

'Internationalization' has become a matter of policy at Dutch institutions. Most have found partners in other countries, often for the purpose of exchanging students. The most common approach is to set up a special programme of courses, in English and usually lasting a few months, so that the visiting students are saved the trouble of learning Dutch. This means that anyone coming from another country for a period of study or research will generally not experience language as a problem. Nearly all required reading is available in English, and also in daily life it is possible to manage in this language.

Learning Dutch

You will have to learn to speak Dutch if you plan to enroll as a regular degree student. There are various possibilities. Especially in the months prior to the start of the academic year, most higher education institutions offer Dutch lessons for foreign students. Nuffic publishes a factsheet with their addresses; it is called 'Dutch language courses for foreign students'. At city hall, the municipal education department can give you a list of the language courses available locally. Private agencies offer many such courses; these are more expensive than those offered by the higher education institutions and the municipality itself, however. Each year the Foreign Student Service publishes a list of non university language courses, complete with addresses. The list can be ordered from the Foreign Student Service, Oranje Nassaulaan 5,
1075 AH Amsterdam, phone +31 (0)20 671 59 15, fax +31 (0)20 673 95 31,
e-mail: ucn@antenna.nl

Students in the Netherlands: Critical and independent

Since the 1950s the Netherlands has offered courses conducted in English especially for the benefit of foreign students. Thanks to various programmes of international cooperation and exchange, more and more foreign students are coming to the Netherlands to complete all or part of their studies, or to pursue a doctorate. But the number of foreign students enrolling in regular degree programmes or coming on their own to take a short course is also large. All of these students soon learn that higher education in the Netherlands means lots of opportunities but also lots of hard work. Students are expected to be critical of what they read and hear, and to be capable of working independently.

Students from other countries soon notice that at a Dutch higher education institutions everyone is expected to do a lot of talking. The traditional situation of a professor standing before a large audience delivering a lecture plays only a small role in most curricula. This teaching method is used only to explain basic material or to elaborate on written study materials. The most common form of teaching is the seminar or working group. Under a teacher's supervision, a small group of students analyzes a certain problem. They get together to discuss it as a group, usually on the basis of a paper one of them has written about one aspect of the problem in question. Teachers stimulate students to take a critical view, not only of the papers presented by their peers but also of the published literature they have read in connection with the problem. In such working groups, everyone is expected to play an active part. On examinations students must demonstrate not only that they know the material, but also that they have formed well-founded opinions on the subject.

AN ACTIVE ROLE FOR STUDENTS

In their curricula, the higher education institutions are increasingly taking into account the needs and wishes of society. This makes the programmes more career-oriented. Internships, or periods of placement in real work situations, are being incorporated into more and more Dutch programmes of higher education. Many courses include fieldtrips to companies or problem-oriented case studies. Alongside their studies, students often sharpen their communication skills by taking on responsibilities in student clubs, student politics, and other extracurricular activities.

Enrollment in a Dutch programme of higher education means hard work and above all independence. Because Dutch higher education is aimed at imparting not just factual knowledge but also insight and creativity, it is not enough just to memorize the required material. Sometimes students are asked to put together their own reading list for an exam, which they then submit for the lecturer's approval. They become skilled users of the new interactive media, such as the Internet and CD-ROMs. Study programmes offer a wide range of elective subjects to choose from. A student who can explain how a particular elective subject is relevant to his or her programme will always be permitted to take the subject. In the midst of the many options, the mountain of literature and the wealth of information sources, an inexperienced student can easily get lost. Fortunately, the teaching staff is there to help students make choices.

Interview

"I feel very confident now, and more open-minded."

Setiyo Hadi Waluyo, Indonesia

Setiyo Hadi Waluyo had years of experience doing agricultural research in his homecountry Indonesia before he came to the Netherlands.

he explains. "There are more possibilities here for doing research than in my country, and more facilities." With the help of a fellowship from the Dutch government he was able to fulfil his wish. While working on his doctorate in Microbiology at Wageningen University, he has been back to Indonesia twice to do experiments in the field. "This is perfectly possible within a 'sandwich' programme, which allows you to do part of your dissertation research in the Netherlands and part in your home country," says Setiyo.

He finds the interaction with the professors and the other students very pleasant. "The people are very open. There's close contact between staff and students.

Though I always call him by his last name, he constantly corrects me. 'My name is Willem,' he says. In general, the counselling is excellent. If you have problems with housing or personal matters, you can always discuss it."

To anyone considering a sojourn in the country of Van Gogh, Rembrandt and Amsterdam, Setiyo offers the following advice:

I feel very confident now, and more open-minded. More than before I came here." Nevertheless, Setiyo will certainly go back home after earning his doctorate. "I want to help to develop my country, and contribute to improving food production. Maybe I'll feel frustrated at times, and I may miss the well organized system of the Netherlands now and then, but I'm prepared for that."

The best opportunities:

Excha
programmes and scholarships

The Dutch government is attempting to make higher education in the Netherlands as accessible as possible to students from other countries. It is urging that more and more courses be conducted in English, and it is concluding agreements with other governments that call for the mutual recognition of diplomas and study credits. The Dutch government is even cooperative in a financial sense. Higher education is heavily subsidized in the Netherlands, which means that tuition fees can be kept relatively low, especially compared with countries like the United Kingdom and the United States.

The easiest and cheapest way to study in the Netherlands is through an exchange programme. Many Dutch higher education institutions have exchange agreements with partner institutions in other countries. For European students there are several programmes, which are described below. American students can apply to their country's own International Student Exchange Program (ISEP). Exchange programmes and agreements are often limited to specific fields or disciplines. Ask at your own university or college what the possibilities are. If you decide to come to the Netherlands independently rather than in connection with an exchange programme, you must realize that you need to start planning at least a year in advance. It takes time to investigate the possibilities for obtaining funding and transferring credits, and to obtain the residence permit you might need.

The Dutch government does not make any scholarships available for foreign students who wish to take a Dutch degree programme at a university or university of professional education. With the exception of students from EU member states who wish to study certain subjects, foreign students are not eligible for the student grants and loans that the Dutch government provides for permanent residents. There are several possibilities for funding, however, which are described briefly here.

SCHOLARSHIPS AND FELLOWSHIPS FROM THE DUTCH GOVERNMENT

The Huygens Programme awards scholarships that enable outstanding foreign students to study or do research in the Netherlands for a period of three to ten months. To be eligible students must be in the final stages of their degree programme or have graduated no longer then two years earlier, or be working on a PhD in their own country. Candidates are selected on the basis of several criteria, the first of which is that they are from one of the 52 countries with which the Dutch government has concluded agreements to encourage international cooperation in culture and education.

The Netherlands Fellowships Programme (NFP) is intended for students and professionals from developing countries. It has four parts. The Regular Fellowships Programme offers professionals the opportunity to enroll in a master's-degree or diploma course at a Dutch institute of International Education. The Special Fellowships Programme provides funds for training that is tailor made to meet specific requests. This training can be delivered by any type of Dutch higher education institution. These two sub-programmes are open to professionals only; candidates must be nominated by their employer. The third part of the NFP, the University Fellowships Programme, offers students and recent graduates at bachelor's level the opportunity to do a full master's degree course at a Dutch university. Finally, the Jan Tinbergen Scholarships Programme offers possibilities for balanced, two-way student exchanges between partner institutions.

As of the study year 2001 2002 the Dutch Minister of Education Culture and Sciences will introduce a new programme issuing students grant. A sum of up to NLG 9 million will be made available to selected institutions of higher education. The universities of professional education (hogescholen) and universities that receive a budget allocation will award grants to students from Indonesia, China, Taiwan and South Africa.
Grants will be made available for all phases of education programmes from undergraduate to post graduate. Students that wish to be considered for a grant shall not be over 35 years of age. Further detailing of the programme will take place in the course of the year 2000.

For more information about Huygens scholarships, contact the Dutch embassy or diplomatic representative in the country of origin, or Nuffic.

EUROPEAN EXCHANGE PROGRAMMES AND SCHOLARSHIPS

Most student exchanges within Europe are funded by the European Union. For European students, the EU exchange programmes have the advantage that many important matters are already taken care of, such as funding, housing and residence permits. Often a student knows in advance how many credits he or she will earn during the period of exchange. The EU programmes offer students from the member states and in some cases from countries associated with the EU, possibilities for completing either entire degree programmes or parts of programmes in another country.

Socrates The Socrates programme is named after the Greek philosopher who taught Plato. Socrates is meant to encourage cooperation among the higher education institutions of Europe. A large amount of money is earmarked for supporting students who wish to complete part of their studies in another country of Europe. A Socrates scholarship covers a period of three to 12 months; the average grant is between 100 and 150 euro per month.
Your own institution must have a structural relationship with an institution in the Netherlands.

Leonardo Leonardo is the European programme for professional education, and is named after the famous Italian artist, writer and scientist, Leonardo da Vinci. Leonardo finances a few internships in the Netherlands for periods of three to 12 months and up to a maximum of 5000 euro. Only students or graduates from educational institutions that take part in the programme and have a structural relationship with a company in the Netherlands, are eligible for a Leonardo grant. Your institution sets the exact eligibility criteria and the amount of the grant.

Tempus The Tempus programme enables universities in Central and Eastern Europe to establish partnerships in the European Union that help them to restructure and adapt their higher education systems. The programme provides scholarships for student exchanges within those partnerships. It is aimed at countries in the region that are not participating already in the Socrates and Leonardo programmes.

You can obtain more information about these European programmes from your own institution, from Nuffic, or from the EU information centre in your own country. For information about possibilities related to regular student grants and refunds for the payment of tuition fees, students from EU member states can contact the Information Management Group by telephone +31 (0)50 599 77 55 or via the Internet: (http://www.ib-groep.nl).

INTERNATIONAL SCHOLARSHIPS

The United Nations and the European Commission offer scholarships and fellowships through several other programmes. For example: from the European Development Fund (EDF), the European Commission awards scholarships to students from the countries of Africa, the Caribbean and the Pacific with which the European Union has a special relationship, as defined in the Lomé Convention. For more information apply to the EU or UN representative in your own country or inquire at your own university.

Fulbright Scholarships are available for American graduate students and researchers. Inquire at your own institution, or at the Netherlands America Commission for Educational Exchange (NACEE): telephone +31 (0)20 627 54 26; http://www.nacee.nl.

"I feel really at home here!" Ana Carballal, Spain

Interview

Ana Carballal (25, Spain) studied geography and history at the University of Madrid before following the advice of friends and applying for an Erasmus grant to study in the Netherlands. For her period of exchange she chose the University of Groningen, where among other things she explored the history of the European Union. What was her first reaction to the Netherlands?

Above all, she enjoyed the social atmosphere in Groningen. She found the people friendly and helpful but also extremely well organized. At the university the teachers make time for their students, despite their busy schedules.

says Ana.

Ana went back to Spain, finished her degree, and then wanted to study abroad for a longer period. This time she chose Amsterdam, where she is working on a master's degree in European Studies. The Dutch embassy in Madrid had supplied her with all the information she needed. For a while Ana could not decide between a university in Belgium and the University of Amsterdam, but in the end she decided to come back to the Netherlands because it seems to her more Europe-oriented. Its location is also ideal, says Ana.

Also, the infrastructure and facilities are good, and I have easy access to all the information I need."

The programme was designed especially for international students, and many of the lecturers are from other countries. The university takes special care of these students, making their lives in a strange city and country a bit easier. "The international student office helped me right from the start, asking whether I had a place to live and if my finances were okay. They gave me a list of useful addresses and a map of Amsterdam, and assigned me a mentor to help me with practical matters. Any time I had a problem - even regarding my social life - I could call on them."

As a Spaniard with an American background who has always had a varied group of friends, Ana is no stranger to an international environment. She especially appreciates this aspect of living in the Netherlands. She speaks English with most of her Dutch friends, but can often use her mother tongue with them as well.

Most of them have been abroad, which is quite different from people in Spain or France. Some Dutch people even speak my language and are familiar with my culture, which makes it easier to communicate with them. I feel really at home in Amsterdam, my favourite city, and not at all like a 'foreigner'. I find Holland an easy country to adapt to." Ana says she would like to stay in the Netherlands, and will try to find a job in a European organization. "In the autumn, when it rains, I might change my mind, but I don't think so," she laughs.

Careful preparation makes life easier: ***Visa, housing*** *and other* ***practical matters***

A number of matters must be arranged, which is why you need time. You will need to know the admission requirements, for example. Then, once you have applied and been tentatively admitted, the process of applying for a visa and funding could take several more months. You need the tentative statement of admission in order to obtain a residence permit for the Netherlands. Remember that the academic year in the Netherlands is from the end of August to the middle of June.

Be sure to allow plenty of time for preparation. You will need to begin at least a year in advance. First, examine the alternatives and choose the course or study programme that interests you most. So that you will not be disappointed, make some second choices as well. At the same time contact the Dutch embassy or the student dean or international relations office of your own institution to find out about possibilities for scholarships and exchanges. And then contact the relevant institution in the Netherlands for more information.

Visas, residence permits and work permits

To enter the Netherlands for study purposes, people from most countries need a visa - either a *Visum Kort Verblijf (VKV)* or a *Machtiging tot Voorlopig Verblijf (MVV)*. The VKV is required if your stay in the Netherlands will not exceed three months. (This requirement does not apply to students from certain countries. Please inquire about it at your nearest Dutch embassy or consulate.) If you will be staying for longer than three months, you have to apply for an MVV. (This requirement does not apply to residents of the following countries: a member state of the EU or EEA - i.e. Iceland, Norway and Liechtenstein-, the USA, Australia, New Zealand, Canada, Japan, Switzerland or Monaco.) Both the VKV and the MVV have to be obtained in advance at a Netherlands embassy or consulate. Some Dutch institutions of higher education are allowed to apply for the MVV for you, using a short procedure that saves a lot of time. Do not depend on this, however.

Within three days of arriving in the Netherlands, all foreign nationals planning to stay for a while must register with the aliens' department of the local police, called *Vreemdelingenpolitie*. Everyone who will stay for longer than three months also needs to obtain a residence permit, a *Vergunning Tot Verblijf (VTV)*. You need this even if you entered the country without a visa, and even if you are from an EU member state.

If you will be staying in the Netherlands for four months or longer, you must register with the Municipality. Within five days of your arrival in the Netherlands you should go in person to the registry office at the town hall or municipal office building. The registry office will be called 'Gemeentelijke Basisadministratie (GBA)' or 'bevolkingsregister'. Go there after you have registered with the Alien Police. (In some cities, both types of registration are done at the same place.)

Unless you are from the EU or EEA, the possibilities to work are limited. All students from outside the EU or EEA need a VKV or residence permit plus a work permit, called *Tewerkstellingsvergunning* or *TWV*, in order to do an internship or work placement in the Netherlands. They are then allowed to work for a maximum of ten hours a week between September and May, or full-time during the months of June, July and August. Your employer in the Netherlands must apply for your work permit at least five weeks prior to your internship or work placement.

For more information on visas etcetera, please visit http://www.nuffic.nl/study/immigration laws.html

INSURANCE

In the Netherlands you are not automatically insured against medical costs. Students must make sure that they have adequate coverage. Foreign students who are privately insured in their own country should carry with them a statement (in English) describing their insurance. If you do not already have insurance that will cover you fully against medical expenses and liability while you are in the Netherlands, you will have to take out a policy. The student dean at your chosen institution can provide you with more information.

"An international education is the best way to invest in your future."

Antonia Dimitrova, Bulgaria

"There are a lot of differences between the Netherlands and my country," says Antonia Dimitrova (21, Bulgaria). "The difference in economic standards is obvious: the roads here are in good shape, the shops are filled with luxury goods, and most people have computers at home.

They've done a good job of making this land liveable, and it's very green. I like the gardens that people look after with such loving care, especially in the villages."

Antonia wanted to get an international education in English in order to improve her chances for a successful career. A Dutch family invited her to come live with them, and thus to save money on housing. This was how she could afford to enroll in International Business Studies at the Arnhem Business School (Hogeschool of Arnhem and Nijmegen) the programme she chose after studying many brochures. Antonia is paying her own way through the four-year programme.

Antonia soon found that she had made a good choice. "After I registered, I was sent a lot of information about what to expect. Then, soon after arriving in Holland, the international students were given an introductory programme. This was followed by several introductory days for the whole student body. It was nice to have a chance to meet some people before sitting next to them in the classroom. But in a university of professional education it's generally easy to get to know people.

But most important, the educational level is good, and I appreciate the combination of theory and practice. For example, all the presentations we have to give force us to develop our computer skills. And the programme will even give me some extra international experience since the institution has links with 60 partner institutions all over the world. I'll be spending a semester in England and sunny Spain," she says with a smile.

"The Dutch in general are very hospitable and open to foreigners. Maybe that's why you see so many different nationalities here.

Antonia laughs. "We learn from each other's cultures and habits. When I went back to Bulgaria for the holidays, my friends said that I was already acting "more European", whatever that means."

Antonia is optimistic about her future. She plans to work for a big international company to gain experience and earn money, and then she wants to start up her own business.

MONEY

Experience shows that to live in the Netherlands for one year costs a foreign student between NLG 1200 and 1600 a month. This is needed to cover daily expenses and to pay the registration and tuition fee. In some cases, students from the EU are even entitled to a regular student grant or a refund of the tuition fee. (Information about this can be obtained from the Information Management Group by telephone +31 (0)50 599 77 55 or via the Internet: http://www.ib-groep.nl.) But most foreign students do not really have the time to work and study as well. In most cases, institutions do not have funds for supporting students.

Although differences between incomes are small in the Netherlands, most students live towards the bottom of the economic ladder. If you have an average student income – from a scholarship, for example – you will find that one-third of it will go towards housing, and food will cost you another third. Fortunately, most higher education institutions offer hot meals at reasonable prices. Many cities have pubs (called *eetcafé's* in the Netherlands) where you can eat cheaply and well. But the cheapest and most pleasant way to eat is to do your own cooking, perhaps together with housemates. Dutch supermarkets carry a large and international variety of products. The remaining third of your money will go towards books, transportation, and other expenses.

HOUSING

If you are taking part in an exchange programme or enrolled in an international course, it is quite possible that a room will be arranged for you. Accept it immediately, or you will regret it later. For finding a place to live in a country as crowded as the Netherlands is not easy. It is usual for Dutch students to find their own rented rooms on the private market. These are usually unfurnished, and kitchens and bathrooms are often shared with others. If you wish, you can always try to find yourself such a room after a few months.

So before you leave your own country, ask your host institution whether or not housing will indeed be arranged for you in advance. If you are in the Netherlands and still looking for a place, ask for advice from the international relations office or the student dean. And let your fellow students know you need a room.

TRANSPORTATION

In the Netherlands you do not need a car to get around. Public transportation will take you almost anywhere. Although train and bus fares are not cheap, it costs much more to operate a car. Particularly in the western part of the country, the cities are very accessible by train, even at night.

The bicycle is the cheapest and easiest way to get around, especially if you live in a city. Most Dutch people, regardless of their profession or status, own a bicycle. Buy a second-hand one rather than a new one. This will save you money, but be sure to buy a strong lock. Sometimes a lock costs more than the bicycle itself!

STUDENT CULTURE

Although the higher education institutions are scattered throughout the country and even within the cities, there is certainly a student culture. Around each institution there is a network of associations that bring students together for study-related activities, sport and recreation. These are run by students; some are international. All receive at least indirect support from the institution in the form of office space and supplies, telephones and computers, and other facilities. Sometimes student clubs even receive direct financial support.

Students also have their favourite pubs, restaurants and other meeting places. The Dutch higher education community wants to be part of society, and not isolated from it.

BEST COPY AVAILABLE

FIRST AND FOREMOST: THE NUFFIC WEBSITE

Quick and easy: Nuffic on the Internet

The Nuffic website offers access to a wealth of online information not only about the products and services Nuffic provides and the grant schemes it manages, but also about higher education in the Netherlands. The website includes a database of all the international courses that are taught in English and it is linked to higher education in the Netherlands.
The address is
http://www.nuffic.nl/study/
If you would like to get more information on the international courses, the Dutch higher education system, or possibilities for financial assistance, you can also contact:

VIDEO FILM: 'STUDY IN THE NETHERLANDS'

Features international students telling why they chose the Netherlands

The video film (available in English, Chinese and Indonesian, and in either PAL or SECAM) is meant for people who are examining options for obtaining advanced training abroad, and who are interested to know what the Netherlands has to offer. Five current and former international students tell why they chose the Netherlands. Their stories give an impression of the wide variety and high level of the courses on offer, as well as an idea of what it is like to live and study in the Netherlands.

The film is intended both for students and for staff members of embassies, universities and other institutions who mediate on students' behalf. It tells its own story and can be shown without introduction at meetings and education fairs. The basic information contained in the film is summarized in the leaflet, which can be distributed to anyone who views the film. This can be further supplemented by other materials in the package. The leaflet's small size makes it also suitable for distribution to students or for placement on a rack from which students can help themselves.

MAGAZINE: DUTCH DEGREE PROGRAMMES 2001-2002

Overview of programmes conducted in Dutch

This booklet offers information for foreign students about the possibilities of pursuing a regular Dutch degree. The national system of education, in which the language of instruction is Dutch, is described, as are the possibilities for financial support and for Dutch language lessons. Practical aspects of living and studying in the Netherlands are discussed, and the booklet contains tables of all the study programmes available at all the universities and *hogescholen* (universities of professional education), plus a list of addresses.
Dutch Degree Programmes can be used independently of the booklet Study in the Netherlands, which is focused on the courses taught in English.

Other sources of information

FACTSHEET: HIGHER EDUCATION IN THE NETHERLANDS: THE SYSTEM, DEGREES AND DIPLOMAS

Brief description of higher education in the Netherlands

This factsheet offers a brief and simple description of higher education in the Netherlands. The three types of higher education are presented, and Dutch degrees and diplomas are compared with those of the English-speaking countries. The system of quality control that guarantees educational standards is also mentioned briefly.

The factsheet is meant for people who are familiar with education in the English-speaking world, but know little or nothing about the system in the Netherlands.

BOOK: LIVING IN HOLLAND

Information on Dutch society

This guide is meant to ease the period of adjustment experienced by foreign students and other temporary residents.

An introduction to living in Holland is best read before a person leaves home. It tells what has to be arranged and decided in advance and generally describes how one's basic needs will be met. It also presents a provocative introduction to Dutch culture and the Dutch mentality.

BOOK: THE HOLLAND HANDBOOK

Practical information for expats, students and others

The richly illustrated Holland Handbook offers expatriates almost 200 full-colour pages of essential information on all aspects of living and working in the Netherlands, such as registration, the housing market, international education, taxes, health care, telecommunications and insurance. It also contains information on Dutch culture and habits, tourist attractions, sports, language courses, etc. The Holland Handbook , published by X-Pat Media, has a special section for students that was prepared in cooperation with Nuffic.

BOOKS:THE LOW SKY, THE LOW SKY IN PICTURES

Books about the Dutch and their society, habits and culture

Historian and journalist Han van der Horst, who is also a member of the Nuffic staff, describes in The Low Sky the way that Dutch society has evolved, and the consequences this has had for contemporary life. Without concealing any of their flaws, Van der Horst analyses with great humour the Dutch and their habits. This book is a must for anyone eager to learn more about this people living below sea level.

In The Low Sky in Pictures, Van der Horst introduces the Netherlands through colourful pictures taken by famous Dutch photographers. He has provided a brand new commentary.

Overview of international courses programmes in the Netherlands

The Netherlands has a long tradition of offering international courses taught in English. This booklet lists more than 500 such courses and programmes at various levels that are currently available at the Dutch higher education institutions. You can obtain more information by contacting the institutions directly. Their addresses can be found under each institution. General addresses are at the back. In all cases the last line of the address should of course be 'The Netherlands'.
A more detailed and up-to-date overview of international courses is also available at the Nuffic website: http://www.nuffic.nl/study/.

The course and programmes are grouped under the following heading:

A) Education and Teacher Training 29
B) Fine and Applied Arts 31
C) Arts and Humanities 35
D) Social and Behavioural Sciences 37
E) Business Administration and Management 44
F) Law 55
G) Natural Sciences 63
H) Mathematics 64
I) Medical Sciences 64
J) Engineering 71
K) Urban and Regional Planning, Architecture 75

frank mohr instituut

faculteit der kunsten • Hanzehogeschool, Hogeschool van Groningen

formerly known as:

MEDIA GN

Centre for Emergent Media

► The Frank Mohr Institute (FMI) is an interdisciplinary institute that provides and develops advanced education, research and product development in the fields of visual art, music, design and the new media. FMI is unique in the Netherlands for its mix of learning, research and commerce. Its staff covers a wide range of expertise: art and theory, music, graphic design, education, multimedia and software engineering. FMI has three divisions: Mohr Education, Mohr Media and Mohr Events.

► The various disciplines within FMI collaborate at the frontiers of media developments, profiting from the encounters of artistic, technological and scientific knowledge, skills and attitudes.

► For further information on the educational activities of FMI you can contact:

[redacted]

► FMI / Mohr Education
Mohr Education has over 10 years of expertise in the area of new media and education. Our educational activities consist of three branches. Students from all over the world participated in various programmes.

► MFA IME (Master of Fine Arts, Interactive Media and Environments)
A full-time 2 year post-graduate programme that offers a Master of Fine Arts degree in interactive media and media environments. The course starts in September 2000 and September 2001.

► ITP (International Training Programme)
An 18 weeks full-time course in visual communication, for students with an art & design background who have little or no experience with new media. Specialization is possible in the areas of interactive multimedia, animation, and digital prepress and illustration. This programme starts in January and August each year.

► Study Centre & Tailor Made Courses
Specialized activities in the areas of new media and education, e.g. tailored courses, consultancy, seminars. The programmes of these courses are adjusted to the specific needs of individuals or groups of students.

The Open University

The Open University (OU), established by Royal Charter in 1969, is Britain's largest and most innovative university. Over 2 million people have studied with the OU and 150,000 have gained OU degrees, which are recognised as equivalent to any other UK University degree.

What can the Open University do for you?

It can give you a BA/BSc degree, MA, MSc, MBA, Diploma or Certificate. Just as important, it opens up a new world of interests, challenges and achievements. The Open University's supported distance learning is for anyone who wants to make a difference to their lives.

The Open University offers a choice of over 150 courses, which are taught in English. We have courses available in Arts, Management, Computing, Education, Health and Social Welfare, Modern Languages, English Law, Mathematics, Science, Social Sciences, Environment and Technology. Provided you're over 18 and resident in the European Union or Switzerland, you're eligible.

For further information on what The Open University can do for you, contact

Faculty of Economics and
Business Administration

Master programmes at the FACULTY OF ECONOMICS AND BUSINESS ADMINISTRATION
The Faculty of Economics and Business Administration of Universiteit Maastricht lists among the youngest in Europe. Nevertheless, it is a well established and well known institution. According to the ratings in the Netherlands, students and employers have ranked it as the best place to study Economics or Business Administration in the country for several years now. The Faculty is highly internationally oriented and widely known for its scholarly research and innovative teaching: Problem Based Learning. The vast majority of courses are offered in English and about 400 foreign students participate in the Faculty's graduate programmes.

Faculty of Economics and Business Administration

Master's degree in INTERNATIONAL ECONOMIC STUDIES
International Economic Studies is international and practically oriented. The study combines a sound theoretical basis with the mastering of relevant professional skills. It focuses on the international aspects of economics and emphasises applied economic analyses. The students can specialize in Money and Banking, in Human Resources, Labour Markets and Society, in Technology and Global Development, in International Competition Policy, and in Social Security (in cooperation with ILO). Its graduates are particularly well equipped to work in international institutions, international consultancy companies, commercial and central banks, international companies and organizations.

The graduate programme has a 1-year, 2-years, and 4-years curriculum option, depending on the students' work and training experiences. The minimum entrance qualification for the shorter programmes is a second-class Honours in an appropriate subject.

Master's degree in INTERNATIONAL MANAGEMENT
International Management deals with the complications that arise when business and organizations operate in several countries, and aims at training specialists in the fields of Marketing and Management or Finance and Accounting with an international orientation. The problems that come with operating in different institutional situations, cultures and markets are the special subjects of study.

Master's degree in INFONOMICS
Infonomics in an interdisciplinary programme filling the gap between technical oriented studies and social sciences. Students will be trained to occupy a variety of positions in the digital economy and e-business world.

Master's degree in ECONOMETRICS
Econometrics is the study of Economics in its relation to mathematics and statistics. The Econometrics programme emphasises the statistical analysis of economic data, mathematical economies and operations research.

Master's degree in INTERNATIONAL BUSINESS STUDIES
The interaction between businesses all around the globe are studied from different points of view. The multi-disciplinary approach is intended to create skilled internationalists who are able to bridge cultural differences in a multinational company.

Tuition NLG 3,716 per annum (2000/2001); EU students are entitled to a reimbursement of the tuition fee.

The tuition fee varies from Dfl 6.000 to Dfl 20.000 for the undergraduate and masters programmes; for advanced postgraduate programmes the fee varies from Dfl 10.000 to Dfl 39.500 for a year

Abbreviations: UC - undergraduate certificate, BP - bachelors, MP - masters, AMP - advanced masters, PC - postgraduate certificate, PhD - doctorate programme

In 1632 the Athenaeum Illustre the forerunner of today's university was founded. With 22.000 students, over 60 (Dutch) degree programmes, over 40 international programmes and more than 5,000 employees, it is one of the major comprehensive universities within Europe. 2,500 foreign students and researchers from over 100 countries contribute every year to the experience of scientific knowledge on a world-wide scale. The Universiteit van Amsterdam has close geographical, historical, and cultural links to the cosmopolitan city of Amsterdam and most faculties are still located at historic sites throughout the city.

UNIVERSITY OF NIJMEGEN INTERNATIONAL PROGRAMMES

Katholieke Nijmegen

The University of Nijmegen offers a wide range of international courses and degree programmes taught in English. The degree programmes are:

International Management

The Faculty of Policy Sciences / Nijmegen School of Management in Business, Government and Environment offers high quality programmes and courses.

- 3 year Bachelor's Programme in International Management
- 1 year Master's Programme in International Management
- a wide range of third year's courses for exchange students in Business Studies, Applied Economics, Political Science, Public Administration, Environmental Policy Sciences, Human Geography and Urban Planning

E-mail: E.deJonge@BW.KUN.NL
http://www.kun.nl/fbw/exchange

Pallas LL.M. in European Business Law

The Pallas LL.M. programme in European Business Law is a postgraduate full-time course. The law departments of eight reputable European universities have developed the programme. The team of lecturers consists of both excellent academics and practitioners from all over Europe. Only highly qualified and motivated students are admitted. Experience has shown that after finishing the programme, career possibilities for the students are excellent, in academic fields as well as in practice.

Information: Ms. M.J.M. Cornielje, CPO
Tel.: +31-24-3613090/3615852, Fax: +31-24-3615838
E-mail:pallas@cpo.kun.nl
http://www.pallas.llm.nl

Master of Science in Periodontology

The University of Nijmegen Dental School is inviting applications from dentists wishing to obtain postgraduate training leading to a Master of Science (MSc) degree in Periodontology. This 3 year comprehensive programme, including Implantology, has been designed to be in accordance with the guidelines of the "Graduate Programme" of the "European Federation of Periodontology" (EFP) and has received accreditation by the EFP.

Information: Dr. C. N. Wolffe, programme co-ordinator, Department of Periodontology
PO Box 9101, 6500 HB Nijmegen, The Netherlands
Tel.: +31-24-3616372, Fax: +31-24-3541314
E-mail: G.Wolffe@dent.kun.nl
http://www.kun.nl/dentistry/education/periodontology

Mathematical Research Institute

The Mathematical Research Institute (MRI) annually organises a Master Class (10 months) and a Spring School (one month in April) for (under)graduates in mathematics. Both programmes vary annually. The MRI is a co-operation of the universities of Groningen, Nijmegen, Twente and Utrecht. The MRI covers a broad range of research specialisations with emphasis on five central areas in mathematics: algebra and geometry, analysis, stochastics and operations research.

Information: Ms. H. Heitink
Tel.: +31-24-3652987, Fax: +31-24-3652140
E-mail: mri@sci.kun.nl
http://www.sci.kun.nl/mri

The Nijmegen Graduate School of Theology

The Nijmegen Graduate School of Theology offers two programmes, characterised by an intercultural and interreligious perspective, under both Dutch and canon law:

- 2 year licentiate programme which prepares undergraduates for theological functions which require a leadership capacity. Specialisations: systematic theology, pastoral theology, spirituality and Eastern Christian Studies
- 4 years doctoral programme which results in the Degree of Doctor in theology and prepares participants for academic functions in the field of theological instruction and research.

Information: Dr. F. Wijsen, Director Nijmegen Graduate School of Theology
Tel.: +31-24-36112474, Fax: +31-24-3611802
E-mail: F.Wijsen@theo.kun.nl
http://www.kun.nl/theo/

MSc and DSc programme in Genetic Epidemiology

Type of qualification: Master of Science in Genetic Epidemiology.
Tuition fees: NLG 21,000.
Length: 44 weeks.

MSc Degree Programme in Epidemiology

Type of qualification: Master of Science in Epidemiology.
Tuition fees: NLG 21,000.
Length: 44 weeks.

NIHES Advanced Short Courses

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 800-2,500.
Length: 2 days-2 weeks.

MSc Degree Programme in Medical Informatics

Type of qualification: Master of Science in Medical Informatics.
Tuition fees: NLG 21,000.
Length: 44 weeks.

MSc Degree Programme in Health Services Research

Type of qualification: Master of Science in Health Services Research.
Tuition fees: NLG 21,000.
Length: 44 weeks.

Clinical Research Diploma (in cooperation with Julius Center for Patient-Oriented Research)

Type of qualification: Clinical Research Diploma.
Tuition fees: NLG 15,000.
Length: 1 year.

MSc Degree Programme in Clinical Epidemiology (in cooperation with Julius Center for Patient-Oriented Research)

Type of qualification: Master of Science in Clinical Epidemiology.
Tuition fees: NLG 21,000.
Length: 44 weeks.

Free University Amsterdam Paedological Institute / Child Neuropsychology

Rijksstraatweg 145, P.O.Box 366, 1115 ZH Duivendrecht,

Faculty of Health Sciences

Master programmes at Maastricht University

Maastricht University is an internationally renowned centre of educational innovation. The purpose of the Faculty of Health Sciences/School of Public Health of Maastricht University and its Master programmes is to provide leadership and expertise in the fields of education, research and services. Accomplishing this purpose requires the joint efforts of professionals from various disciplines involved in the understanding of various factors that maintain health or cause disease.

Master's degree in Public Health

The MPH programme is designed to focus on the acquisition of knowledge and skills applicable to a career in the field of Public Health. The first phase within the programme will focus on analysis and diagnosis within the field of public health. The next phase highlights intervention and evaluation methods and techniques. During the third phase the application of acquired knowledge to existing public health problems is the focus of interest and finally, the last phase, consists of writing the thesis.

The MPH is a programme for which students register for full-time study over a twelve month period. The MPH programme will commence in September of each academic year.

for the course description

Master's degree in Health Professions Education.

The leading theme in the curriculum is the competences required of an educationalist in the health professions' domain. The first year focuses on the creation of active learning environments, which are adapted to the capabilities of students and focus on the health needs of a population. The second year will be devoted to continuous learning and continuing education, the organisation of education and quality assurance and to the acquisition of skills in research and educational development. Students will also do a research project and write a thesis in the second year.

The duration of this programme is two years and two months. Students are required to reside in Maastricht for three periods of six weeks each. During the remaining periods, students will carry out learning activities by way of web-based distance education. This programme will commence in January of each year.

- *Small-group tutorials*
- *Community oriented*
- *Problem-based approach*
- *Web-based supported*
- *Multi-disciplinary curriculum*

litho universiteit delft 1/1

Delft University of Technology

Delft University of Technology, founded in 1842, has an outstanding reputation for education and research and is the largest university of technology in The Netherlands. The university has fifteen fields of study in engineering which cover all areas of engineering science.

International orientation plays an essential role in the strategic planning of the University. This is reflected in the M.Sc. International Programme which provides academic training with an international perspective. TU Delft has numerous international relations in education and research and there are close collaborative ties with multinational companies, industry and research institutes.

Master of Science International programme 2001-2003

12 master of science courses in engineering for students from all over the world

Duration: Two years

Course language: English

Entry requirements:

- B.Sc. (major should fit intended M.Sc course)
- Grade Point Average 75%
- TOEFL: 550 points (PBT); 213 points (CBT) or: IELTS 6.0
- GRE (general test) average 550 points

Scholarships/funding:

Refer to our brochure for details.

Starting dates:

- Introduction programme: August 1
- M.Sc course: beginning of September

Accomodation:

Guaranteed housing upon scheduled arrival

Fees:

Tuition: NLG 13,000 yearly

Cost of living: NLG 1,400 monthly

Application:

Applications must be accompanied by

- a completed application form
- recent passport photo
- TOEFL or IELTS score form
- CV and essay in English
- transcripts and previous academic diplomas
- GRE general test score form
- photocopy of passport
- two letters of reference

Fully documented applications preferably to be submitted by January 1

The 2001-2003 International Programme comprises the following M.Sc. courses:

- Aerospace Engineering
- Architecture (Renewal and Redesign of City Areas)
- Applied Physics
- Biochemical Engineering
- Chemical Engineering
- Electrical Engineering
- Marine Technology (Naval Architecture)
- Materials Science and Engineering
- Mechanical Engineering
- Systems Engineering, Policy Analysis and Management
- Technical Informatics (Computer Science)
- Technical Mathematics (Engineering Mathematics)

The introduction programme takes one month, and is held prior to the official M.Sc. courses. The main goal of the introduction programme is to give students a thorough preparation for participation in the educational system of TU Delft, whilst also allowing students time to adjust to the Dutch way of life.

Length: 2 years.

Master of Science Programme in Technical Mathematics (Engineering Mathematics)

Type of qualification: Master of Science degree in Technical Mathematics.
Tuition fees: NLG 13,000 per year.
Length: 2 years.

Delft University of Technology / Faculty of Technology, Policy and Management

Julianalaan 134, P.O.Box 5, 2600 AA Delft.
Phone: +31 - (0)15-2788012, Fax: +31 - (0)15-2785690
E-mail: msc@bu.tudelft.nl, Http://www.tudelft.nl/msc

Master of Science Programme in Systems Engineering, Policy Analysis and Management

Type of qualification: Master of Science degree in Systems Engineering, Policy Analysis and Management.
Tuition fees: NLG 13,000 per year.
Length: 2 years.

Delft University of Technology / TopTech Studies

Kluyverweg 4, P.O.Box 612, 2600 AP Delft.
Phone: +31 - (0)15-2788019, Fax: +31 - (0)15-2781009
E-mail: secr@toptech.tudelft.nl, Http://www.toptech.tudelft.nl

Master of Space Systems Engineering

Type of qualification: Master's degree.
Tuition fees: NLG 66,000.
Length: 9 weeks within 1 year.

Fontys Hogescholen, University of Professional Education / English Courses in Electronic/Electrical and Mechanical Engineering

Rachelsmolen 1, P.O.Box 347, 5600 AH Eindhoven.
Phone: +31 - (0)877-870936, Fax: +31 - (0)40-2444242

E-mail: p.scholten@staf.fnt.hvu.nl, Http://www.hvu.nl

BSc in Engineering Product Design

Type of qualification:	Bachelor of Science degree.
Tuition fees:	NLG 2,816.
Length:	11 months.

Master of Science in Engineering Product Design

Type of qualification:	Master's degree.
Tuition fees:	NLG 14,670.
Length:	45 weeks.

International Institute for Infrastructural, Hydraulic and Environmental Engineering (IHE)

Westvest 7, P.O.Box 3015, 2601 DA Delft,
Phone: +31 - (0)15-2151715, Fax: +31 - (0)15-2122921
E-mail: ihe@ihe.nl, Http://www.ihe.nl

International Course in Integrated Coastal Zone Management (CZM)

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Master Programme in Coastal Engineering and Port Development

Type of qualification:	Master of Engineering degree / extra six months for MSc possible.
Tuition fees:	NLG 18,000 (+ NLG 9,000 for MSc).
Length:	Master of Engineering: 48 weeks; MSc: 74 weeks.

Master Programme in River Engineering and River Basin Development

Type of qualification:	Master of Engineering degree / extra six months for MSc possible.
Tuition fees:	NLG 18,000 (+ NLG 9,000 for MSc).
Length:	Master of Engineering: 48 weeks; MSc: 74 weeks.

Master Programme in Underground Space Technology

Type of qualification:	Master of Engineering degree / extra six months for MSc possible.
Tuition fees:	NLG 18,000 (+ NLG 9,000 for MSc).
Length:	Master of Engineering: 48 weeks; MSc: 74 weeks.

Short Course on Underground Space Technology

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	4 weeks.

Master Programme in Sanitary Engineering

Type of qualification:	Master of Engineering degree / extra six months for MSc possible.
Tuition fees:	NLG 18,000 (+ NLG 9,000 for MSc).
Length:	Master of Engineering: 48 weeks; MSc: 74 weeks.

Master Programme in Transportation and Road Engineering

Type of qualification:	Master of Engineering degree / extra six months for MSc possible.
Tuition fees:	NLG 18,000 (+ NLG 9,000 for MSc).
Length:	Master of Engineering: 48 weeks; MSc: 74 weeks.

Master of Science Programme in Biomolecular Sciences

Type of qualification:	Master of Science degree in Biology or Chemistry with molecular sciences.
Tuition fees:	NLG 2.900 (EU and EEA); NLG 10.000 (non-EU)
Length:	2 years.

Gain International Skills @ the University of Twente

Are you looking for the next step in your career? The University of Twente offers excellent study programmes. Programmes that are both on a high academical level and practically oriented in an international environment. Studying at our University in technical or social sciences implies that you will join international networks, relation-ships that will be of great value for your career. We invite you to enjoy the multicultural society in Holland and are happy to introduce you to our European networks. The UT participates in some hundred SOCRATES networks and has strong research relationships with European industry. An important gateway is the European Consortium of Innovative Universities in which the UT plays a key role.

Our international Masters programmes

Presently, students can choose from the following Masters programmes:

■ Telematics ■ Educational and Training Systems Design ■ Engineering Mathematics ■ Financial Engineering
■ Environmental and Energy Management ■ International Full-time MBA programme
■ International Executive MBA programme ■ Fine Arts ■ Microsystems and Microelectronics

Some of the postgraduate courses are delivered as dual mode courses, distance learning combined with on-campus education

The following programmes are in preparation for the near future (2000-2001)
■ Educational and Training Systems for Telelearning
■ Industrial Design and Manufacturing ■ Membrane Technology ■ MBA inservice Industry ■ Human Resources Development ■ Innovative and Entrepreneurial Management ■ Industrial Laser Technology

Other Postgraduate programmes

We offer a wide range of PhD-programmes, as well as specialised post-experience programmes. Some examples are:

■ a wide scope of advanced courses for industry, in areas like Microscopy of Polymers, Rubber technology, R & D Evaluation, Thermoplastic Elastomers, and Innovation Management.
■ Designers Courses for engineers, two year programmes in cooperation with European industry in areas like Chemical Process Development, Computational Mechanics, and Telematics
■ PhD-programmes in the main research areas of the UT, like telematics, microtechnology, superconductors, process technology, biomedical technology, optical materials, multimedia applications in education, clean technologies, higher education policy studies, management of innovation
■ certificated programmes, like Energy Management and Cleaner Production in Small and Medium Scale Industries, Institutional Management and Change in Higher Education

The University of Twente is an internationally innovative research oriented university. It is located in an international area, a few hours drive from major industrial regions like Hamburg, the Ruhr area and Rotterdam. Twente is a swiftly growing area that is well known for its hightech companies. Studying and working in this dynamic environment can be uniquely combined with an active social life on our Campus. We offer you all modern sporting facilities and a safe and healthy environment to live in.

Management of the European Metropolitan Region

Type of qualification: Master's degree (I+II); certificate (only I).
Tuition fees: I+II: NLG 13,200; I: NLG 9,900.
Length: I: 13 weeks; I+II: 48 weeks

The Institute for Housing and Urban Development Studies (IHS) in Rotterdam, the Netherlands is one of the largest training institutes in Europe, specialising in housing, urban environment and urban management in Asia, Africa, Latin America, Central and Eastern Europe. Since its establishment in 1958, IHS has been providing training, research and advisory services in the fields of urban management, housing and urban environmental management. Over the years, more than 4,000 urban professionals from 120 different nations have made their way to IHS classrooms to take part in a post-graduate course, a Masters Programme or a PhD Programme.

Making Cities Work

Short post-graduate courses at IHS, Rotterdam, the Netherlands

IHS short courses have a problem solving approach, and facilitate the exchange of experiences. In addition to regular coursework, participants work on a specific topic with relevance to their own work situation. This topic will be the subject of a final report, to be presented at the end of the course.

Typical participants of the IHS short courses are housing and/or urban development professionals and managers from the government, the private sector and NGOs, with diverse educational backgrounds.

3-Month courses

Topics

10 January - 11 April 2001

Land Tenure and Management
Housing Finance
Urban Management: Planning and Finance
Urban Environmental Management

24 April - 25 July 2001

Public Management
Urban Poverty Reduction
Municipal Environmental Policies
Urban Infrastructure Management

Specialisation modules

Topics

29 January - 9 February 2001

Environmental Policy and Instruments
Information Management and Decision Support Tools
Public Private Partnerships

29 January - 9 February 2001

Corporate Environmental Management
Capacity Building
Inner City Revitalisation

All courses are conducted in English.

Studying in Rotterdam, the Netherlands

Rotterdam is the second largest city in the Netherlands and the largest port in the world in terms of trans-shipment volume. It is a modern, bustling city with an international flavour, which over the years has developed into a showcase for modern architecture and planning. Rotterdam is said to have a pragmatic and future oriented mentality. Its continuous adaptation to changing circumstances is manifested in the regular reorganising efforts made by municipal departments.

IHS participants have the opportunity to learn from that tendency, passively by just living in this city for a while, actively by visiting interesting projects and organisations.

For applications, or for more information please contact:

Institute for Housing and Urban Development Studies (IHS), PM & C Bureau

Master's Course on Urban Environmental Management

Type of qualification: Master of Science degree in Urban Environmental Management.
Tuition fees: NLG 45,000 (institutional); NLG 30,000 (self-payer).
Length: 73 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Environmental Policies and Legislation

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Housing Finance

Type of qualification: Postgraduate Diploma
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Information Management & Decision Support Tools

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Inner City Revitalisation

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Land Tenure and Management

Type of qualification: Postgraduate Diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Community-based Solid Waste Management Systems

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Corporate Environmental Management

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Inner City Revitalisation

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Municipal Environmental Policies and the Preparation of Local Agendas 21

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Private Sector Participation/Public Private Partnerships

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development:
Specialisation workshop: Project Management

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

You'll find a detailed, up-to-date overview at the Nuffic website: http://www.nuffic.nl/study/

The Institute for Housing and Urban Development Studies (IHS) is an independent international institute offering post-graduate education, research and advisory services in the fields of Housing, Urban Management and Urban Environmental Management. Together with some well-established European universities, IHS offers three Master programmes and a PhD programme.

Programmes

MSc, MA and PhD

MSc programme in Urban Environmental Management (CUE)

The Centre for the Urban Environment (CUE), a collaboration of IHS and Wageningen Agricultural University, offers an MSc programme in Urban Environmental Management. The curriculum provides an intensive professional education in urban environmental management over a period of 17 months. Course modules include environmental economics, waste water treatment, environmental policy, solid waste management, urban transport, environmental impact assessment, and an integrative workshop in a European country. Professionals with five years' experience in a relevant field and a good first degree can apply for the programme. Exceptional recent graduates are also welcome.

MA programme in Urban Management (UMC)

Since 1992, IHS has offered a 16-month Master's programme in Urban Management, operated jointly with Erasmus University, Rotterdam, through the Urban Management Centre (UMC).
The curriculum stresses the mastery of analytical skills in public management, finance, economics and public-private partnerships. Subjects addressed include urban development, governance and public management and infrastructure provision and finance. Professionals with five years' experience in a relevant field can apply.

MSc programme in Urban Housing Management (UHM)

Since September 1999, IHS offers a 16-month Master's programme in Urban Housing Management, in collaboration with Lund University, Sweden. The MSc programme in Urban Housing Management deals with the topic of housing in a manner consistent with the principles stated in the Istanbul Declaration on Human Settlements. It also addresses the challenges created by the changing roles of government, especially the trend toward the decentralisation of authority from national to regional and local levels and to the non-governmental sector.
The structure of the MSc programme is modelled after the four main stages of the housing process: the initiation stage, the planning and design stage, the implementation and construction stage, and the use and maintenance stage. Professionals with at least two years of experience in a relevant field are welcome to apply.

PhD

The PhD programme is designed for staff members of foreign academic institutions or high level government policy departments. PhD degrees are granted under the auspices and academic control of one of the Netherlands universities, giving them international recognition. To be admitted to the programme, a candidate should have a good, relevant Master's degree, an original and theoretically sound research proposal and a proven capability to do research. A candidate will be allowed a maximum period of four years to finalise the dissertation.

All courses are conducted in English.

IHS
Institute for Housing and Urban Development Studies

International Course on Housing and Urban Development: Specialisation workshop: Real Estate and Project Management

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Training of Trainers and Capacity Building

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Training of Trainers and Capacity Building for Urban Management

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Environmental Management

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Governance

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Infrastructure Management

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Management: Planning and Finance

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Policy: Formulation, Management and Evaluation

Type of qualification: Certificate.
Tuition fees: On request.
Length: 3 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Poverty: Social and Economic Strategies to Reduce Urban Poverty at the Local Level

Type of qualification: Postgraduate diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

International Course on Housing and Urban Development: Specialisation workshop: Urban Governance

Type of qualification: Postgraduate Diploma.
Tuition fees: NLG 12,000 (institutional); NLG 8,000 (self-payer).
Length: 13 weeks.

Master's Course in Urban Housing Management (in cooperation with Lund University, Sweden)

Type of qualification: Master of Science degree in Urban Housing Management.
Tuition fees: NLG 45,000 (institutional); NLG 30,000 (self-payer).
Length: 64 weeks.

Master's Course in Urban Management

Type of qualification: Master of Arts degree in Urban Management.
Tuition fees: NLG 45,000 (institutional); NLG 30,000 (self-payer).
Length: 68 weeks.

International Institute for Aerospace Survey and Earth Sciences (ITC)

Hengelosestraat 99, P.O.Box 6, 7500 AA Enschede.

Diploma Course in Geoinformatics (GFM.4)

Type of qualification: Diploma.
Tuition fees: NLG 9,000.
Length: 9 months.

Master of Science Course in Geoinformatics (GFM.2)

Type of qualification: Master of Science degree.
Tuition fees: NLG 23.500.
Length: 18 months.

Professional Masters Course in Geoinformatics (GFM.3)

Type of qualification: Professional Master degree.
Tuition fees: NLG 12.000.
Length: 12 months.

Master of Science Course in Geoinformation Management (GIM.2)

Type of qualification: Master of Science degree.
Tuition fees: NLG 23.500.
Length: 18 months.

Professional Masters Course in Geoinformation Management (GIM.3)

Type of qualification: Professional Master degree.
Tuition fees: NLG 12.000.
Length: 12 months.

Master of Science Course in Urban Planning and Land Administration (UPLA.2)

Type of qualification: Master of Science degree.
Tuition fees: NLG 23.500.
Length: 18 months.

Professional Master Course in Urban Planning and Land Administration (UPLA.3)

Type of qualification: Professional Master degree.
Tuition fees: NLG 12.000.
Length: 12 months.

Master Programme in Land and Water Development (LWD)

Type of qualification: Master of Engineering degree / extra six months for MSc possible.
Tuition fees: NLG 18.000 (+ NLG 9.000 for MSc).
Length: Master of Engineering: 48 weeks;
MSc: 74 weeks.

International Module in Agricultural Trade, Environment and Horticulture

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 3,000 per month (Socrates students: no fees).
Length:	12-24 weeks.

Hogeschool Delft / Department of Animal Husbandry and Production

Brasserskade 1, P.O.Box 3190, 2601 DD Delft,
Phone: +31 - (0)15-2150215, Fax: +31 - (0)15-2150299
E-mail: transfer@hsdelft.nl, Http://www.hsdelft.nl

Quality, Farm Management and Environment Related to Sustainable Animal Production Systems

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	14 weeks.

IPC Livestock Barneveld College, International Training Centre on Animal Husbandry and Milling Technology

Wesselseweg 32, P.O.Box 64, 3770 AB Barneveld,
Phone: +31 - (0)342-414881, Fax: +31 - (0)342-492813
E-mail: io@ipcdier.hacom.nl, Http://www.ipcdier.hacom.nl/bc

Artificial Insemination of Pigs

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Feed Formulation

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	1 week.

International Animal Feed Training Programme

Type of qualification:	Diploma.
Tuition fees:	On request.
Length:	13 weeks.

International Course on Pig Husbandry

Type of qualification:	Diploma.
Tuition fees:	On request.
Length:	26 weeks.

International Course on Poultry Husbandry

Type of qualification:	Diploma.
Tuition fees:	On request.
Length:	26 weeks.

Modern Animal Feed Manufacturing

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Modern Breeder Farm Management

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Modern Broiler Farm Management

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Modern Hatchery Management

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Modern Layer Farm Management

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Modern Pig Farm Management

Type of qualification:	Certificate of Attendance.
Tuition fees:	On request.
Length:	2 weeks.

Advanced Horticulture Programme, a Practical Greenhouse Management Course

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 4,500.
Length: 3 weeks.

Crash Course on Management in Protected Crop Production

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 1,800.
Length: 1 week.

International Course on Protected Cultivation; management of sustainable production and crop protection in glasshouse and polyhouse

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 7,000 (+ NLG 1,750 optional week).
Length: 4 weeks (+ optional 1 week).

IRC International Water and Sanitation Centre

Vuurtorenweg 37, P.O.Box 93190, 2509 AD The Hague,
Phone: +31 - (0)70-3068930, Fax: +31 - (0)70-3589964
E-mail: zepeda@irc.nl

Monitoring for Effectiveness in Water Supply and Sanitation Activities

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 4,500 (2 weeks) + 1,700 (for optional week).
Length: 2 weeks +1 week optional

Innovation and Practical Training Centre Plant Production and Food Processing / IPC Plant

Westerholtstraat 2, 5961 BJ Horst,
Phone: +31 - (0)77-3984555, Fax: +31 - (0)77-3984160

Advanced Course in Mushroom Growing

Type of qualification: Certificate.
Tuition fees: Approx. NLG 2,200.
Length: 1 week.

Short Course in Mushroom Growing

Type of qualification: Certificate.
Tuition fees: NLG 4,050.
Length: 2 weeks.

International Agricultural Centre (IAC)

Lawickse Allee 11, P.O.Box 88, 6700 AB Wageningen,
Phone: +31 - (0)317-495495, Fax: +31 - (0)317-495395
E-mail: iac@iac.agro.nl, Http://www.iac-agro.nl

Cours international de vulgarisation rurale, with modules on 1) rural communication networks, 2) management of extension organisations (course given in French)

Type of qualification: Certificate of Attendance.
Tuition fees: Full course: NLG 10,000;
Modules: NLG 5,000 each.
Length: Full course: 6 weeks;
Modules 1+2: 3 weeks each.

Gender, Organisational Change, Agriculture and Leadership

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 8,000.
Length: 3 weeks.

International Course on Dairy Farming in Rural Development

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 10,000.
Length:	14 weeks.

International Course on Food and Nutrition - Food and Nutrition security including modules on: 1) project planning and proposal writing, 2) food and nutrition security in urban areas

Type of qualification:	Postgraduate diploma.
Tuition fees:	Full course: NLG 10,000; Module 1: NLG 4,000; Module 2: NLG 2,500.
Length:	Full course: 21 weeks.

International Course on Food Processing, with modules on: 1) protection of food quality in the supply chain, 2) quality assurance, 3) marketing management

Type of qualification:	Certificate of Achievement.
Tuition fees:	Full course: NLG 10,000; Module 1: NLG 4,500; Modules 2+3: NLG 5,000.
Length:	Full course: 14 weeks; Module 1: 4 weeks; Modules 2+3: 5 weeks each.

International Course on Livestock and Environment Interactions

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 5,500.
Length:	2 weeks.

International Course on Local Level Management of Trees and Forests for Sustainable Land Use, with modules on: 1) highlights, 2) policy issues, 3) planning issues, 4) management

Type of qualification:	Certificate of Attendance.
Tuition fees:	Full course: NLG 10,000; Modules 1+2: NLG 3,000; Module 3: NLG 5,000; Module 4: NLG 3,500.
Length:	Full course: 13 weeks; Modules 1+2: 2 weeks each; Module 3: 4 1/2 weeks; Module 4: 2 1/2 weeks.

International Course on Plant Breeding

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 10,000.
Length:	15 weeks.

International Course on Protected Cultivation

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 7,000.
Length:	4 weeks.

International Course on Rural Microfinance

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 5,500.
Length:	2 weeks.

International Course on Seed Production and Seed Technology, with modules on: 1) quality assurance, 2) plant variety protection, 3) seed quality

Type of qualification:	Certificate of Attendance.
Tuition fees:	Full course: NLG 10,000; Modules 1+3: NLG 3,500; Module 2: NLG 4,800.
Length:	Full course: 14 weeks; Modules 1+2+3: 2 weeks each.

International Course on Vegetable Production, with modules on: 1) protected cultivation, 2) mushroom cultivation

Type of qualification:	Certificate of Attendance.
Tuition fees:	Full course: NLG 10,000; Module 1: NLG 7,000; Module 2: NLG 2,000.
Length:	Full course: 14 weeks; Module 1: 4 weeks; Module 2: 1 week.

International Potato Course: Potato Production, Storage and Seed Technology, with modules on: 1) potato post harvest technology, 2) potato seed inspection and certification

Type of qualification:	Certificate of Attendance.
Tuition fees:	Full course: NLG 10,000; Module 1: NLG 3,500; Module 2: NLG 4,000.
Length:	Full course: 14 weeks; Modules 1+2: 2 weeks each.

Management of Extension Organisations

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 5,000.
Length:	3 weeks.

Participatory Planning and Monitoring

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 5,000.
Length:	3 weeks.

Research-Extension-Farmer Linkages

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 5,000.
Length:	3 weeks.

Stage sur les plants de pomme de terre (course given in French)

Type of qualification:	Certificate of Attendance.
Tuition fees:	NLG 5,000.
Length:	3 weeks.

Integrated Water Resources Management

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 7.000.
Length: 4 weeks.

Master Programme in Water and Environmental Resources Management

Type of qualification: Master of Engineering degree / extra six months for MSc possible.
Tuition fees: NLG 18.000 (+ NLG 9.000 for MSc).
Length: Master of Engineering: 48 weeks; MSc: 74 weeks.

Service Oriented Management of Irrigation Systems

Type of qualification: Certificate of Attendance.
Tuition fees: NLG 7.500.
Length: 3 ½ weeks.

Master Programme in Hydroinformatics

Type of qualification: Master of Engineering degree / extra six months for MSc possible.
Tuition fees: NLG 18.000 (+ NLG 9.000 for MSc).
Length: Master of Engineering: 48 weeks; MSc: 74 weeks.

Master Programme in Hydrology

Type of qualification: Master of Engineering degree / extra six months for MSc possible.
Tuition fees: NLG 18.000 (+ NLG 9.000 for MSc).
Length: Master of Engineering: 48 weeks; MSc: 74 weeks.

International Institute for Land Reclamation and Improvement (ILRI)

Lawickse Allee 11, P.O.Box 45, 6700 AA Wageningen,

Sustainable development may be the keyword to your professional future. To enable you to meet your goals, the Institute of Spatial Planning and Environmental Science of Hogeschool IJselland in Deventer (the Netherlands) offers the

International Masters Programme
International Bachelors Programme

focussing on an integral approach of spatial and environmental quality. These one-year courses start each year in September.

MSc students will follow one of the following pathways:
- Master of Environmental Science
- Master of Environmental Technology
- Master of Urban and Regional Planning
- Master of Nature Conservation and Biodiversity Management

BSc students may choose for
- Bachelor of Environmental Science
- Bachelor of Environmental Technology
- Bachelor of Urban and Regional Planning

The programmes offer an international study-environment. Admission to the Masters Programme is open to candidates who have completed a relevant Bachelor of Science degree.
Admission to the Bachelor of Science Courses is offered to those who have a degree in any branch of study, different from the pathways offered, or those who haven't as yet completed their bachelors in a relevant subject.

For more information, ask for a brochure at your institute or contact Hogeschool IJselland:
telephone: +31 570 663623 (I. Peet, secr.), e-mail: ibp@hsij.nl ; imp@hsij.nl

European Postgraduate Course in Environmental Management

EPCEM

September 2001 / June 2002

An international Master programme in Environmental Management and Policy-making

If you have recently obtained a Master's degree in a relevant discipline, and if you wish to start (or continue) a professional career in environmental management in a governmental organisation, a private enterprise or a NGO, EPCEM is the ideal course. Since 1992, over 200 participants from almost 30 countries have been awarded its advanced Master's degree in Environmental management.

Background of EPCEM-participants ('92-'99):

Disciplines:		Origin:	
Earth Sc.	17%	The Netherlands	32
Biology / Ecology	15%	Hungary	42
Agronomy / Forestry	12%	Slovakia	13
Engineering	11%	Czechia	8
Economics / MBA	10%	Poland	26
Chemistry / Physics	9%	Other EastEurope	40
Social Sc.	8%	Russian Federation	20
Law	5%	Ukraine	10
Environmental Sc.	4%	Baltic states	22
Physical planning	3%	Other ex-Soviet Union	8
Public health	3%	Other EU countries	19
Other disciplines	2%	Outside Europe	11

Objectives and programme outline

EPCEM aims to strengthen international co-operation in environmental policy, to enhance environmental expertise in European countries and to harmonise environmental policy and environmental management in Europe.

The programme offers:

- a multi-disciplinary set-up
- a problem-solving oriented approach
- advanced knowledge and professional skills
- application of concepts and theory in practice
- projects & internships in European countries
- Learning by active participation

EPCEM is a one-year full-time course, consisting of 3 modules of theoretical preparation and skills training, and 2 modules of practical experience:

1 Environmental science	**3 wks**
2 Environmental policy and management	**9 wks**
3 Regional differentiation	**3 wks**
4 Interdisciplinary research project	**16 wks**
5 Individual internship	**8 wks**

Tuition and application

The full tuition fee is Dfl. 25,000. Some participants may be eligible to financial support, **but all candidates are advised to also apply for support from other sponsors, as early as possible**. Candidates from Central and Eastern Europe can apply for a scholarship and a waiver of the tuition fee. For Dutch candidates a limited number of places is available for a reduced tuition fee of Dfl. 10,000. **For all candidates who want to apply for a reduction or waiver of the tuition fee the deadline for application is 15 March 2001!** A special selection procedure in April 2001 will decide on the matter.

Organisation and information

EPCEM is organised by four environmental science departments in The Netherlands, in co-operation with Debrecen University, Hungary, and three French higher education institutes ("Grandes Écoles"). Other institutes from different European countries are involved.

For more information contact the EPCEM secretariat, IvM, Vrije Universiteit, Amsterdam, De Boelelaan 1115, 1018 HV Amsterdam, The Netherlands. Tel.: +31.(0)20.444.9580/9555 Fax: +31.(0)20.444.9553 E-mail: epcem@ivm.vu.nl internet: http://www.vu.nl/ivm/

VU & UvA, Amsterdam; Leiden; WUR, Wageningen; DU, Debrecen, Hungary; ISIGE, Paris, France

List of addresses

In this section you will find mailing addresses of:

- Dutch higher education institutions that offer international courses and programmes 97
- Netherlands Education Information Offices Abroad 102
- Netherlands Alumni Associations (NAAs) 103

DUTCH HIGHER EDUCATION INSTITUTIONS

Institutions are listed alphabetically by the name of the institutions. In all cases the last line of the address should of course be 'The Netherlands'.

NETHERLANDS EDUCATION INFORMATION OFFICES

The following institutes serve as contact points for students and scholars of the host countries who are seeking contact with Dutch universities. Most institutes give courses, conduct research and publish academic literature in fields relevant to their background and location. With growing frequency they organize cultural events, including lectures, exhibitions, excursions, and Dutch language lessons.

Egypt
Netherlands-Flemish Institute in Cairo (NVIC)
1, Dr. Mahmoud Azmi Street
P.O. Box 50, 11211 Zamalek, Cairo

NETHERLANDS ALUMNI ASSOCIATIONS (NAAs)

People who studied or took courses in the Netherlands have founded Netherlands Alumni Associations (NAAs) in a number of countries. These independent associations organize various activities. For anyone considering a period of study in the Netherlands, alumni are always a good source of first-hand information. They can tell candidates about their own experiences, and provide them with practical advice that will help them to prepare for their own stay. We therefore suggest that prospective candidates contact the local NAA before they leave their own country. We would also encourage alumni of Dutch higher education institutions to become a member when they return home.

Netherlands Alumni Associations exist in the following countries:

Argentina

Netherlands Alumni Association of Argentina
ACANEB - Asociación Cultural Argentino - Neerlandesa de Ex-Becarios
c/o Royal Netherlands Embassy
Avda. de Mayo 701, piso 19
1084 Buenos Aires
Phone: +54-1-334 34 74
Fax: +54-1-334 27 17

Bangladesh

Netherlands Alumni Association of Bangladesh
42/7 Block F, Babar Road
Mohammadpur, Dhaka - 1207
Phone: +880-2-323 866

Bulgaria

Bulgarian - Dutch Alumni Association
